

MULTI-POINT LOCK THAT CAN BE USED ON THE JAMB OR SILL

MPL is a casement and awning window lock solution that is a true solution –the industry's first multi-point lock that can be located on the jamb or on the sill. This unique concept opens up greater window design possibilities because the optional flexible drive mechanism can follow the contours of the window shape. And its corrosion-resistant components make MPL an excellent choice for coastal applications.

SILL MOUNT APPLICATION

FLEXIBLE TAPE

INNOVATIVE MULTI-POINT TAPE DRIVE MECHANISM NAVIGATES CORNERS

HANDLE MOUNTS UNDER THE OPERATOR

NEAT, CLEAN APPEARANCE

REMOVABLE HANDLE AND ESCUTCHEON

BUILDER FRIENDLY SYSTEM

LOW PROFILE KEEPER

CLEAN, SIMPLE DESIGN MOUNTS FLUSH WITH SASH PROFILE
